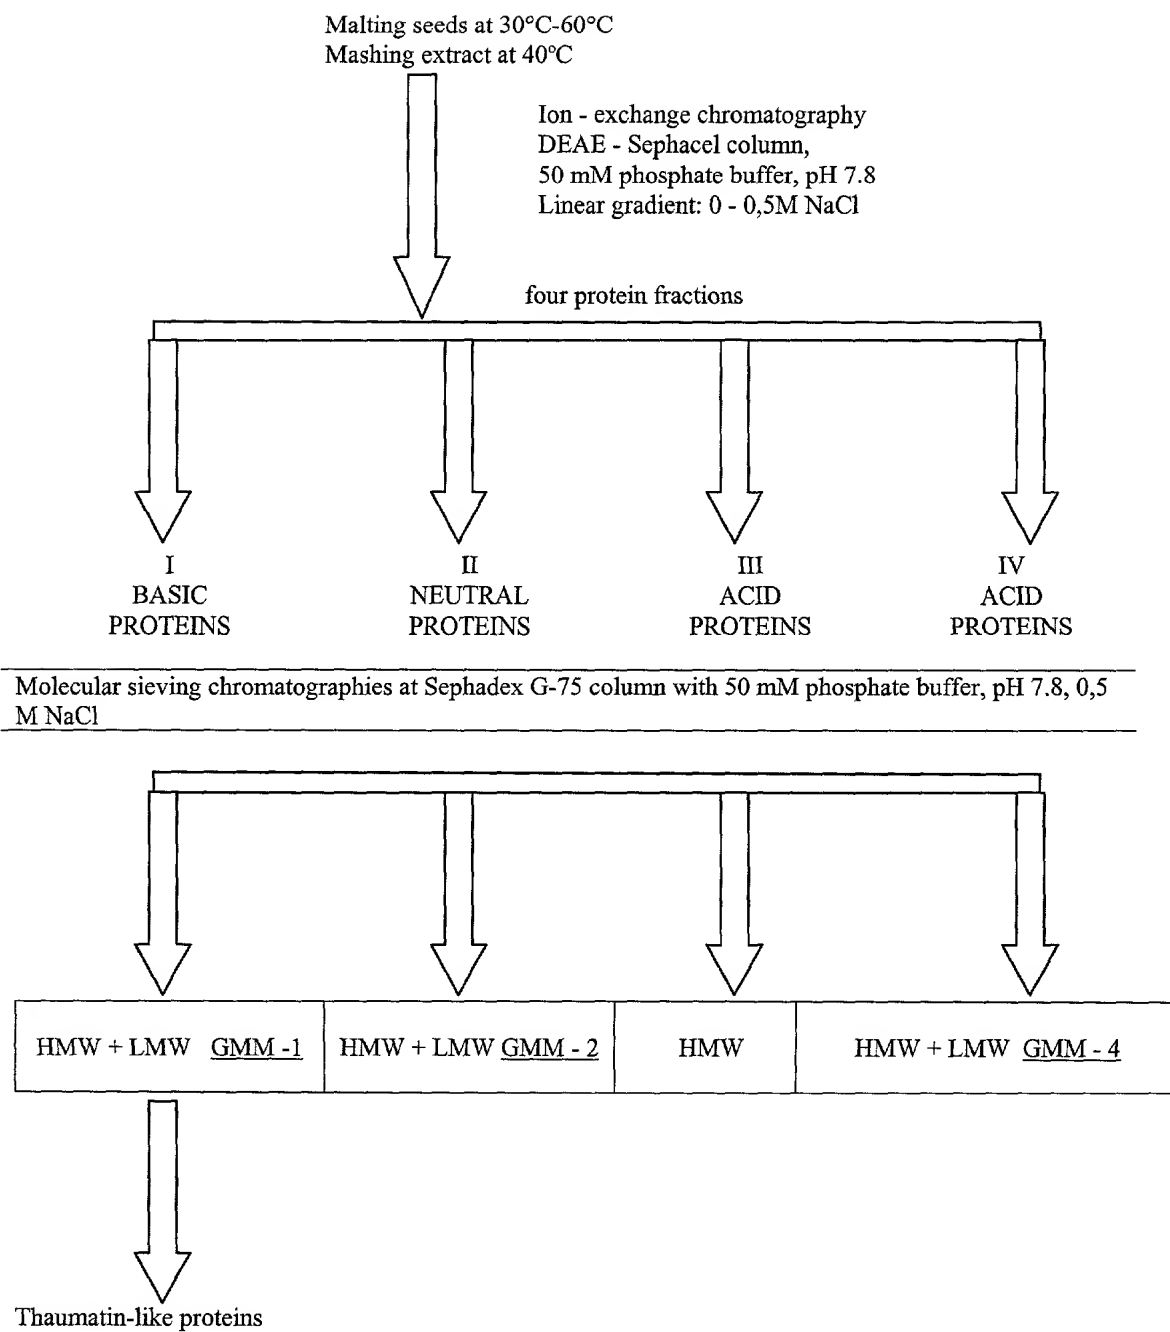

Figure 1

Figure 2: Fermentation Rates. This graph shows the volume of CO₂ produced (ml) over time (minutes) for four different fermentation conditions. The y-axis ranges from 0 to 100 ml, and the x-axis ranges from 0 to 60 minutes. The four conditions are represented by different symbols: solid circles, solid squares, open triangles, and open circles. The solid circles show the highest rate of CO₂ production, reaching approximately 92 ml at 60 minutes. The solid squares reach approximately 72 ml, the open triangles reach approximately 32 ml, and the open circles reach approximately 14 ml at 60 minutes. The graph is titled 'Fermentation Rates'.
